Content Writing

Has the skills of research and analysis in the technical contents. Ensure the contents are plagiarism-free and most important should be SEO-based. Also, can perform proofreading for verification of contents.

PROJECT EXPERIENCE

Deployment of Blog Web Application

Nov 2023 – MAR 2024 (Sem 6)

A Blog Web Application that allows users to create, publish, and manage blog posts. It typically includes features such as user authentication, a text editor for writing content, categories or tags for organization, and a comment section for reader engagement. The application provides a responsive and user-friendly interface, enabling both authors and readers to interact seamlessly. Users can edit or delete their posts, and admins may have additional controls for moderation. The backend handles data storage, security, and content management, ensuring smooth operation across devices.

Development of Ecommerce Web Application

Nov 2023 – MAR 2024 (Sem 6)

MongoDB and React

An Ecommerce Web Application that enables businesses to sell products or services digitally. It includes essential features such as product listings, a shopping cart, secure checkout, and payment gateway integration. Users can browse products, add them to their cart, and complete purchases seamlessly. The application also supports user authentication, order tracking, inventory management, and customer reviews. Admins can manage product catalogs, process orders, and analyze sales data. With a responsive design, it ensures a smooth shopping experience across all devices.

Other Projects

Music Player

Clothing Web Application
